

Full-Media Solutions Case Study

ICE Coalition (www.environmentcourt.com)

CASE STUDY:

Full-Media Solutions has supported the Coalition's communications by engaging with audiences throughout the world.

In March 2010, at London's SOAS (School of Oriental and African Studies) the Westminster branch of the United Nations Association invited the Coalition's Stephen Hockman QC to address an audience of diplomats, NGOs, environmentalists and students, outlining his views on the urgent need for the ICE, its juridical powers, where it might be located and how it might be assembled.

Full-Media Solutions proposes to underpin the Coalition's planned TV film in 2011 of a mock trial, which will elaborate on the permutations outlined by the legal experts who form the foundation of the Coalition.

F-MS is currently assisting in preparations for ICE's attendance at 2011's *Rio + 20* summit; further information can be found at www.earthsummit.org

The proceedings at *Rio + 20* - from March through June 2011 - are expected to mirror the original *Earth Summit*, where Agenda 21 and the UNFCCC were created.
